2

**Vision
Open University 21**

"To act as responsible member of society, addressing the social and environmental challenges of this century by disseminating the knowledge and methods we have accumulated as an academic organization."

Innovation **Accountability**

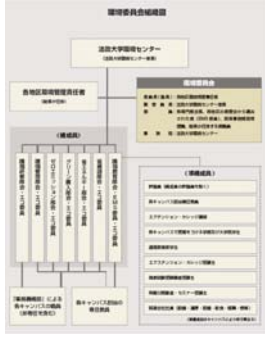

Leadership

HOSEI

4

Leadership

Initiated by the president, Hosei has implemented a top-down approach throughout the organisation. Based on vision and strategies sustainability is at the core of a comprehensive organisational change process.

HOSEI

5

Leadership

HOSEI

6

Innovation

Embedded in the sustainability approach is a culture of academic and administrative innovation. Supporting entrepreneurial change agents throughout the organisation, this is achieved by collaborating with internal and external stakeholders.

Accountability

With the publication of its environmental report, Hosei demonstrates its high level of accountability.

To strive for continual improvement, activities are benchmarked against external standards of good practice by internal and external audits (AA, ISO14001, JAB Accreditations, OECD).

Exploring Best Practice, Building Capacity and Networks

Expected Results

- What are the most urgent needs?
- What & how could practices be transferred?
- Who would be willing to engage?
