

Using the combined forces of students,
professors, and employees in order to reduce
climate gas emissions at ETH Zürich

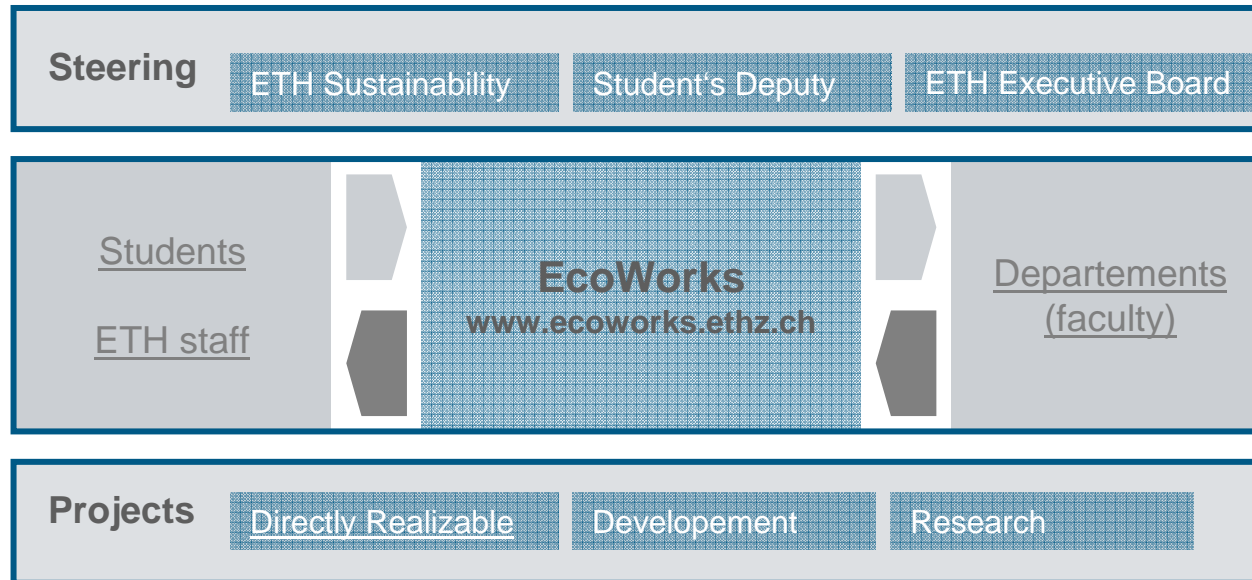

EcoWorks stands for Ecological Projects

- EcoWorks is an aggregation platform for projects that reduce climate gas emission at ETH Zürich.
- Projects ideas can be submitted by students, professors, scientific or technical staff.
- EcoWorks connects people.
- In creative conferences people with different background develop and initiate projects.
- Projects will be carried out by students.
- EcoWorks assists projects during implementation phase.

EcoWorks Organization

Benefits of EcoWorks

- Reducing climate gas emissions at ETH Zürich.
- Encouraging students to develop and carry out practical projects.
- A socio-technical process involving all members of ETH Zürich.
- Students will care more for their place of study.
- Integrating ecological sustainability into teaching.
- Fostering cross departmental dialogue and knowledge creation within the ETH Zürich.
- Increasing ecological awareness.

Creative Workshop: „unBla CO2 2008“

- One-day Creative Conference.
- Will be attended not only by students, but also by professors, teaching assistants and other staff of ETH Zürich, as well as external experts.
- Will be led by a professional team of moderators.
- unBla is a method enabling dialogic learning at conferences.
- Target is to create 20 projects that will result in a direct or indirect reduction of the CO2-output of ETH Zürich.
- Best projects will be rewarded with prizes.

Time Line

- Technical platform will be ready by June 2008:
www.ecoworks.ethz.ch
- First projects to be generated subsequently.
- Creativ Workshops „unBla CO2 2008“ will take place November 13/14 2008.
- Offical launch of EcoWorks after unBla CO2.
