

ISCN WG „Integrated Programs“ Briefing for Track B

Integrating Education, Research, and Facilities

Strategies for integrated project management

Working Group 4

Per Lundqvist, KTH, Energy Technology Stockholm, Sweden

Katja Brundiers, Arizona State University, School of Sustainability, USA

Integrating Education, Research and Facilities

- Campus as Living Laboratory: connecting the built environment with mindsets through projects and ‘being there’:
 - Focus on sustainability from an integrated perspective
 - Real-world learning opportunities for students
 - Faculty to supervise research,
 - Practitioners from on- and off-campus to guide applicability
 - Mutual learning among students, faculty, facilities/practitioners
- Added value:
 - Scientifically sound and applicable solution approaches
 - Buy-in & ownership for implementation
 - ‘Points of Pride’ for communication & outreach (impact for society)
- Achievements: adoption of idea & replication through
 - Universities of Gothenburg, Prague, ETH Zurich, ASU
 - Conferences (special sessions) at AASHE, AGS, AAAS
