The Rise of College and Tuition Fees

The rise of college and tuition fees continues to outpace the median family income and other key individual economic indicators.

Just 12 years ago, the cost of a four-year public college education was about 18% of the annual income of a middle-class family. Ten years later, it accounts for 25% of that same family's annual income.

During the last 25 years, the cost of higher education has grown **440%**

Nearly four times the rate of inflation and double the rate of medical care cost increases.

The cost increases have occurred at both public and private colleges.

IT BEGAN IN CANADA...

"IT'S DISRUPTING EVERYTHING!"

"IT'S A TSUNAMI OF POORLY UNDERSTOOD PEDAGOGY!"
